

APPENDIX C – CROSS TABULATIONS OF SURVEY QUESTIONS BY CHILDREN’S SCHOOL YEAR AND GENDER

What follows are additional tables for each question distributed by the children’s school year and gender. All percentages are column percentages, based on the number of those who replied to that question (unless otherwise specified). Valid cases are indicated in the case summaries for each question.

As Table 5 indicates 0.5% of children did not provide the information about their School Year. These will be excluded from the following tables. Gender information was available for all children as per Table 3.
