High Quality Infrastructure is essential for Fixed Wireless Access Networks

Source: *Telecoms.com*

As regulators worldwide prepare for 5G, some operators with enterprise Fixed Wireless Access (FWA) services are facing the total loss of their networks, especially in parts of Asia and Africa. [\[read more\]](#).

DSA/DMA

France, Germany, the Netherlands press for tighter rules in DMA

Source: *Euractiv*

The three countries already took a firm stance on the proposal when it was first announced by the European Commission in December 2020. France was especially concerned with the flexibility and the scope of the DMA, while Germany wanted greater leeway for member states to curb the dominant position of tech giants. [\[read more\]](#).

SPECTRUM

Brussels warns against Divergence over 5G Spectrum for Verticals

Source: *Policy Tracker*

“Different bands have been chosen in different countries, with different bandwidths,” said Branimir Stantchev, head of the spectrum for wireless broadband sector at the Commission. “In addition, further methodologies regarding cost or interference mitigation differ between member states”. [\[read more – subscription required\]](#).

SATELLITE COMMUNICATIONS

EU plans Satellite Constellation but Eutelsat’s Role is in Question

Source: *Total Telecom*

The European Union (EU) says that Eutelsat’s recent acquisition of a minority stake in UK-based OneWeb could result in a conflict of interest, since the satellite specialist is also involved with the EU’s own low Earth orbit (LEO) constellation project. [\[read more\]](#).

TELEVISION

Half of DTT Households can receive DVB-T2

Source: *Advanced Television*

Out of 26 million Italian households, around 23.7 million receive TV through the DTT platform. The figures come from a market survey conducted by the Ugo Bordoni Foundation (FUB) in March 2021. [\[read more\]](#).

Italy deals Major Blows to IPTV Pirates

Source: *Advanced Television*

Italy’s Financial Police, based in Milan, have identified and seized two illegal IPTV transmission centres located in Switzerland and Sicily. [\[read more\]](#).

OTT Video will generate more Revenue than Traditional Pay-tv

Services; Operators should Update their Approach

Source: Analysys Mason

“OTT video services will generate USD 201.2 billion of retail revenue per year by 2025, compared to USD 181.6 billion for traditional pay TV”. [\[read more\]](#).

ECOMMERCE

Delivery Costs most important Factor when choosing Online Stores

Source: Ecommerce News Europe

In a major part of Europe, delivery costs are the most important factor for online shoppers who are choosing which online store they will buy from. This doesn't necessarily mean online customers are fundamentally unwilling to pay for delivery, but the willingness differs per country. [\[read more\]](#).
