ETNO presents New Study on Effects of the EU Data Act on the Telecom Sector

As European legislators make progress on the landmark EU Data Act, a new study commissioned by ETNO and authored by LE Europe brings a fresh perspective on the impact of the draft regulation on European telecom operators and their business models. **Etno.eu** ([read more](#))

DEVELOPMENTS IN THE POSTAL SECTOR

PostNL: These Unprecedented Circumstances are translating into Slower Volumes

PostNL has provided an update on its performance revealing a 'further deterioration of macroeconomic environment'. **Post & Parcel** ([read more](#))

Even Thousands of New Electric Vehicles – Posti decided on a New Clean Vehicle Roadmap

Posti's net zero emission goal was approved by SBTi as the first logistics company in the world. A lot of work has already been done to reach the goal: Posti has, among other things, Finland's largest heavy biogas fleet, and more than a hundred electric vans have been purchased this year alone. **IPC** ([read more](#))

Royal Mail rolls out latest High-Speed Parcel Sorting Machine in Birmingham to meet Ongoing Shift in Demand for Parcels

With parcel deliveries now representing almost £6 in £10 of Royal Mail's revenue, the new automated sorting machine at Birmingham Mail Centre will support the company's ongoing transformation into even more of a parcels-led business. **IPC** ([read more](#))
