DEVELOPMENTS IN ELECTRONIC COMMUNICATIONS NETWORK AND SERVICES

What Spectrum will be needed for a 6G Future?

During a session at the Mobile World Congress (MWC), panellists discussed the capacity demands for 6G and how to find new and untapped frequencies going into the 2030s. **Policy Tracker** ([read more](#) – subscription required)

Brussels launches Consultation on Future of ICT Sector

The European Commission is asking the telecoms industry if and how spectrum policy can improve connectivity in Europe. **Policy Tracker** ([read more](#) – subscription required)

DEVELOPMENTS IN THE DIGITAL SECTOR

Think Tank: EC should reject 'Fair Share' Proposal

Following the European Commission's launch of a consultation on a proposal to make content companies pay government-mandated fees to broadband providers, science and technology policy think tank the Information Technology and Innovation Foundation (ITIF), has called for rejection of the plan. **Advanced Television** ([read more](#))

DEVELOPMENTS IN THE POSTAL SECTOR

Royal Mail: We have to carefully balance our Pricing against a continued Decline in Letter Volumes

Royal Mail has announced that from 3 April 2023, the price of a First Class stamp will increase by 15p to £1.10p, and the price of a Second Class stamp will increase by 7p to 75p to ensure the one-price-goes-anywhere Universal Service remains sustainable. **Post & Parcel** ([read more](#))

Australia Post welcomes "A Discussion of Modernising Postal Services"

Australia Post welcomes the Federal Government's decision to launch a discussion paper and undertake community consultation on the modernisation of postal services. **Post & Parcel** ([read more](#))
