

DEVELOPMENTS IN ELECTRONIC COMMUNICATIONS NETWORK AND SERVICES

European Commission releases Results of the Consultation on the Future of Electronic Communications

The Commission says that aim of the exploratory consultation was to gather data and views on the technological and market developments, measures regarding fairness for consumers, barriers to the Single Market and the question regarding a fair contribution by all digital players benefitting from the digital transformation. **5G Observatory** ([read more](#))

BEREC consults on Draft Guidelines detailing Quality of Service (QoS) Parameters

BEREC updated the performance thresholds for wireless networks to be categorised as very high capacity networks. The new guidelines set stricter targets for wireless networks, to reflect current 5G network performance. **Cullen International** ([read more](#) – subscription required)

DEVELOPMENTS IN THE DIGITAL SECTOR

Germany eyes new Digital Strategy amid Global Tech Race

Germany aims to boost its international competitiveness with a new digital strategy, while experts have warned of a growing geopolitical race for technological supremacy and the need to defend liberal values and human rights in the digital space. **Euractiv** ([read more](#))

DEVELOPMENTS IN THE POSTAL SECTOR

UPU: Postal Sector has Vital Role in supporting a Resilient and Dynamic Economy

The Universal Union Postal's report on the state of the postal sector in 2022 stated that postal services demonstrated their essential role, as a communications facilitator, and contributed significantly to economic growth and resilience. **Cullen International** ([read more](#) – subscription required)
