### Roam Like at Home: Dutch Regulator warns Operators to Provide the same Quality of Service when Roaming

Source: *Cullen International*

ACM has given mobile operators four weeks to deliver 4G services wherever available to their customers roaming in the EU. A study by ACM has shown that this is currently not always the case, according to a statement published on 21 January 2020. In some cases, Dutch customers cannot use 4G services while roaming, even when the visited network supports 4G. [\[read more – subscription required\]](#).
