Category definitions:

Category 1 - Short Codes are those that are the same on each network and support interconnected services.

Category 2 - Short Codes are those that have the same value for similar services but are normally provided "on-net" and not necessarily interconnected

Category 3 - Codes that are completely uncoordinated and are served only on-net. They may relate to the operation of the network or involve connection to third parties.

Tariff Types:

Tariff Type A: Free to caller from fixed and mobile - Subscribers calling/texting short code numbers falling under this tariff type are not charged whether they originate the call from a fixed telephone, or a mobile phone.

Tariff Type B: Free to caller from fixed, charged from mobile - Subscribers calling/texting short code numbers falling under this tariff type are not charged if they originate the call from a fixed telephone, but charged a charge not exceeding that for a call to a fixed network if the call originates from a mobile phone. In the case of SMSs, a charge not exceeding that of a conventional SMS to the same network is applicable.

Tariff Type C: Charged to caller from fixed and mobile - Subscribers calling/texting short code numbers falling under this tariff type are charged a charge not exceeding that for a call to a fixed network whether the call originates from a fixed telephone or mobile phone. In the case of SMSs, a charge not exceeding that of a conventional SMS to the same network is applicable.

Legacy: A service arrangement on a short code that was in operation before the revision of the numbering plan in 2006. In many cases these services have become well known to users and need to be continued for the foreseeable future.

Migration: The process of changing a code involving opening access to the service on a new code and running the new and old code in parallel until the traffic using the old code drops to a negligible level and the old code may be withdrawn. This allows the code to be changed without causing inconvenience to the users.
