

DEVELOPMENTS IN ELECTRONIC COMMUNICATIONS NETWORK AND SERVICES

CNMC proposes to deregulate Fixed Voice Call Termination

The Spanish regulator, CNMC, consulted until 11 June 2025 on a proposal to deregulate the wholesale fixed call termination market. **Cullen International** ([read more](#) – subscription required)

ITU marks 160 Years of Telecoms Policy Regulation

The International Telecommunication Union (ITU) was founded on 17 May 1865 to standardise telegraph exchanges across Europe. In the decades since, it has grown into an international body that sets standards for communications technologies, strategy and policy. ITU Secretary-General stated that the ITU's mission was "far from complete," with one-third of the world's population lacking internet access. **Policy Tracker** ([read more](#) – subscription required)

DEVELOPMENTS IN THE DIGITAL SECTOR

EU launches a European Vulnerability Database to boost its Digital Security

The European Commission has announced the launch of the European Vulnerability Database (EUVD) by the EU Agency for Cybersecurity (ENISA). **European Commission** ([read more](#))

DEVELOPMENTS IN THE POSTAL SECTOR

ERGP recommends to re-assess the Universal Service Scope and Obligations in the Future Review of Postal Regulation

The European Regulators Group for Postal Services (ERGP) has recommended that the current scope and obligations of the universal service (US) should be revised in a future review of the postal regulatory framework. **Cullen International** ([read more](#) – subscription required)
