

## DEVELOPMENTS IN ELECTRONIC COMMUNICATIONS NETWORK AND SERVICES

### Spain trumpets 6G Research Progress

A Spanish-led initiative coordinated by Madrid based research institute IMDEA Networks. Backed by the NextGeneration EU recovery fund and Spain's equivalent – the Recovery, Transformation and Resilience Plan (PRTR) – Enable-6G concerned itself with some specific features that will be incorporated into the standard. These include things like low power communication and sensing. [Telecoms.com](#) ([read more](#))
