

DEVELOPMENTS IN ELECTRONIC COMMUNICATIONS NETWORK AND SERVICES

European Cybersecurity Month 2025 kicks off with Focus on Phishing Threats

The European Cybersecurity Month has begun on 1st October 2025. This is an annual awareness-raising campaign, offering practical guidance for EU citizens to stay safe online. This year's focus is on combating phishing, the most common method attackers use to breach the security of digital devices. **European Commission** ([read more](#))

Which Bands are being used for 5G?

Of the spectrum bands identified for 5G, 3.6 GHz got the widest industry support because of its transformative potential. Mobile trade body the GSMA described it as the “principal 5G launch band” because its wide bandwidth can “maximise network performance while minimising consumer costs”. **Policy Tracker** ([read more](#) – subscription required)

DEVELOPMENTS IN THE DIGITAL SERVICES SECTOR

TikTok, Meta, and YouTube overturned in most DSA Content Disputes

Major online platforms such as TikTok, Facebook, Instagram, and YouTube have been found to “wrongly” remove online content, according to a new transparency report from the EU-certified body Appeals Centre Europe. The findings relate to the workings of the bloc’s online governance rulebook, the Digital Services Act (DSA). **Euractiv** ([read more](#))

DEVELOPMENTS IN THE POSTAL SECTOR

Canada Post: There are Practical Changes we can make to Modernise

President of Canada Post, Doug Ettinger has sent a letter to customers about Canada Post’s transformational changes in the midst of a postal strike which began on 25 September. **Post & Parcel** ([read more](#))

USPS’s New App allows Customers to Digitally Preview their Mail

The U.S. Postal Service has launched its new Informed Delivery Mobile app, designed to provide customers with greater convenience for managing their mail and packages anytime, anywhere. **Post & Parcel** ([read more](#))
