

## DEVELOPMENTS IN ELECTRONIC COMMUNICATIONS NETWORK AND SERVICES

### **BEREC supports Europe's Telecom Framework Fit for the Future**

Speaking at an invitation only roundtable discussion held by Oxera (Belgium), BEREC Incoming Chair 2027, outlined BEREC's strategic vision for the future of telecom regulation in Europe. She underlined that the current regulatory framework has delivered significant benefits in terms of competition, investment, innovation and consumer protection. **BEREC Europa** ([read more](#))

### **Commission invites Contributions to shape future EU Quantum Act**

Quantum technologies are set to power the next wave of innovation, and the European Commission wants Europe to be at the forefront. A call for evidence is now open to shape the future EU Quantum Act. **European Commission** ([read more](#))

## DEVELOPMENTS IN THE DIGITAL SECTOR

### New Measures unlock Access to Data from largest Online Platforms to support Research

As of 29 October 2025, new rules under the Digital Services Act (DSA) will allow researchers to gain unprecedented access to very large online platforms' data to study the societal impact stemming from the platforms' systems. **European Commission** ([read more](#))

## DEVELOPMENTS IN THE POSTAL SECTOR

### Changes to NZ Post Minimum Obligations to support Commercial Sustainability of Mail Service

The Government has approved changes to the Postal Deed of Understanding (the Deed) between the Crown and New Zealand Post (NZ Post) following a Review. The changes are aimed at ensuring New Zealanders have ongoing access to the mail service while providing flexibility for NZ Post to operate the mail service in a commercially sustainable way. **Ministry of Business Innovation & Employment** ([read more](#))
