DEVELOPMENTS IN ELECTRONIC COMMUNICATIONS NETWORK AND SERVICES

Gigabit Infrastructure Act (GIA): upcoming European Commission Guidance will not regulate Land Prices

The GIA aims to facilitate the deployment of very high-capacity networks by mandating access to existing infrastructure, enabling the deployment of new infrastructure and by lowering administrative barriers. **Cullen International** ([read more](#) – subscription required)

Update on NIS2 Transposition across Europe

This report takes stock of the progress made by the 27 EU member states in transposing the Directive on measures for a high common level of cybersecurity across the EU. **Cullen International** ([read more](#) – subscription required)

EU presents Action Plan to secure Submarine Cables

The action plan serves as a roadmap outlining EU-level recommended actions to tackle security challenges related to submarine cables. The measures laid down in the action plan are designed for four main objectives: prevention, detection, response and recovery from threats and vulnerabilities. **Cullen International** ([read more](#) – subscription required)

and significantly more than in Asia. Within our continent, Germany hosts the most headquarters. **Ecommerce News** ([read more](#))

DEVELOPMENTS IN THE POSTAL SECTOR

La Poste Groupe: These Results are the Outcome of our Diversification Strategy

La Poste has announced its 2024 results, highlighting a solid financial performance with revenue reaching €34.6bn, a 1.5% increase year-over-year. In a challenging macroeconomic context, the 2024 results are improving, driven by the diversification of La Poste. **Post & Parcel** ([read more](#))

‘Europe hosts most Headquarters of eCommerce Giants’

Of the world’s 250 largest ecommerce companies, 95 have their headquarters in Europe. That is three more than in North and South America combined
