

DEVELOPMENTS IN ELECTRONIC COMMUNICATIONS NETWORK AND SERVICES

EU said to allow Telecoms Copper Switch-Off delay to 2035

The European Commission is set to allow member states to delay the switch-off of copper telecommunications networks to 2035, giving the industry more time to make the transition to faster fiber networks, according to people familiar with the matter. [Mining.com](#) ([read more](#))

Open Internet: French Regulator Arcep warns against AI as Gateway to the Internet

The discussions during an event in Brussels were accompanied by a study on the impact of generative artificial intelligence (AI). It recommended that the open internet principles must be reasserted in the AI era. Stakeholders focused on the feasibility of 5G network slicing under the current EU net neutrality rules. Oxfordshire Firm granted European Spectrum for LEO Satellites

The Principality of Liechtenstein has awarded high priority Ka-band radio spectrum filings to the UK satellite firm Open Cosmos, which will now plough ahead with its own LEO constellation. [Telecoms.com](#) ([read more](#))

DEVELOPMENTS IN THE DIGITAL SERVICES SECTOR

Grok must face the Digital Services Act

The issue is not whether Europe should support AI innovation; it is whether AI systems that demonstrably fail safety standards and pose a risk to society should enjoy access to the European market. [Euractiv](#) ([read more](#))
